

Ryan Wilson

Automation Engineer & Integration Specialist

London, ON (226) 450-1233 ryanwilson2005@gmail.com linkedin.com/in/ryan-e-wilson

PROFILE

I design and deploy automated workflows that replace manual processes with reliable, self-running systems. Over the past two years I've built 15+ production n8n workflows handling job scraping, AI-powered scoring, CRM updates, email delivery, database operations, and multi-step orchestration on self-hosted infrastructure. My approach: understand the business process, map the data flow, build it in n8n or code, and make it bulletproof with error handling and monitoring. Currently running a full stack on a Hetzner VPS with n8n, PostgreSQL, Docker, and Claude AI integration.

TECHNICAL SKILLS

Automation	n8n (15+ workflows), Apify, webhooks, cron, retry logic	Integration	HubSpot, Gmail, Notion, Resend, Claude/OpenAI, 10+ APIs
Database	PostgreSQL, Neon, SQL, schema design, deduplication, ETL	AI & LLM	Claude API, MCP, prompt engineering, structured output
Full Stack	Next.js, React, Node.js, Python, Flask, Tailwind	Infrastructure	Linux, Docker, SSH, Hetzner VPS, GitHub Actions

EXPERIENCE

Automation Engineer | Independent 2023 – Present

- Built a fully automated outbound proposal system: n8n schedule trigger fires twice daily, Apify scrapes postings, PostgreSQL deduplicates, Claude scores jobs in Pass 1, drafts tailored proposals for high scores in Pass 2, Resend delivers via email. Zero manual intervention from scrape to inbox.
- Designed an automated job discovery pipeline: nightly scrape of 50+ postings, Neon PostgreSQL deduplication, Claude AI scoring with structured breakdowns, HTML email digest, and a live Flask dashboard for reviewing results.
- Integrated 10+ external APIs into production workflows: Apify, HubSpot, Gmail, Notion, Resend, Claude, Neon, Google Calendar. Handled authentication, pagination, rate limiting, and error recovery for each.
- Self-hosted the entire automation stack on Hetzner VPS: n8n, PostgreSQL, Docker containers, SSH-callable Claude CLI, cron monitoring, and automated log analysis running 24/7 with alerting.
- Developed Flask dashboards for automation output: sortable/filterable tables, stat cards, dark/light theme, one-click actions. Built for non-technical users to get immediate insight into pipeline results.
- Documented 20+ integration gotchas from production n8n work. Published as internal SOPs with structured debug logs (problem, root cause, fix, lessons).
- Built full stack web applications with Next.js, Node.js, and PostgreSQL. Deployed on Vercel and self-hosted environments.

AZ Licensed Commercial Driver | London Hospital Linen Service Nov 2018 – Present

- Delivered to 50+ healthcare facilities across the region with a clean compliance and safety record.

IT Technician, Deskside Support | Nautalex Business Solutions Feb – Aug 2018

- Resolved server, network, hardware, and application issues across a multi-platform environment. Deployed and configured software and hardware for 100+ end users.

CERTIFICATIONS

Introduction to Data Analytics | IBM | 2024

Supabase From Scratch: Serverless Database Backend with JS | Udemy | 2024

Microsoft Certified Computer Technician

CompTIA A+ Certified

EDUCATION

Bachelor of Arts, Sociology | University of Western Ontario, London ON

Associate of Arts | Fanshawe College of Applied Arts and Technology, London ON
