

Ryan Wilson

Technical Support Specialist & Developer

London, ON (226) 450-1233 ryanwilson2005@gmail.com linkedin.com/in/ryan-e-wilson

PROFILE

Technical support professional with a foundation in IT infrastructure and hands-on development. I started in deskside support resolving server, network, and application issues for 100+ users, then expanded into full stack development, database management, and workflow automation. I can read code, write SQL, trace issues through an application stack, and communicate clearly with both end users and engineering teams. Comfortable owning problems from initial report through root cause to documented resolution.

TECHNICAL SKILLS

IT Support	Active Directory, TCP/IP, DNS, DHCP, VPN, M365, hardware	Database	PostgreSQL, Neon, Supabase, SQL, schema design, ETL
Full Stack	Next.js, React, Node.js, Python, Flask, REST APIs	Automation	n8n, monitoring, error alerting, webhook integration
Infrastructure	Linux, Docker, SSH, Hetzner VPS, self-hosted services	Documentation	SOPs, debug logs, knowledge bases, cross-team comms

EXPERIENCE

Systems Builder & Technical Problem Solver | Independent

2023 – Present

- Built and maintained 15+ automated workflows handling scheduling, data processing, error detection, and alerting. Developed monitoring systems that catch failures and deliver structured notifications.
- Designed database schemas in PostgreSQL and wrote complex SQL queries for deduplication, filtering, scoring, and reporting. Comfortable reading and debugging production queries across multiple environments.
- Created web applications with user-facing dashboards, filterable data tables, and real-time status displays using Python (Flask) and Node.js. Built for clarity and end-user usability.
- Documented every technical issue resolved with structured debug logs: problem statement, root cause, fix applied, and lessons learned. Maintained a growing knowledge base of 20+ common patterns.
- Integrated 10+ external APIs (Google, HubSpot, Notion, email services, scraping tools) into automated pipelines. Debugged authentication, rate limiting, payload formatting, and error handling across all of them.
- Self-taught full stack development from HTML/CSS/JavaScript through React, Next.js, and PostgreSQL backends. Understands application architecture from frontend to database layer.

AZ Licensed Commercial Driver | London Hospital Linen Service

Nov 2018 – Present

- Delivered to 50+ healthcare facilities across the region with a clean compliance and safety record. Managed time-sensitive logistics across multiple stops daily.

IT Technician, Deskside Support | Nautalex Business Solutions

Feb – Aug 2018

- Resolved server, network, hardware, and application issues across a multi-platform environment (Windows, Linux, networking equipment).
- Deployed and configured software and hardware for 100+ end users.
- Provided direct user support: troubleshooting, ticket resolution, follow-up communication, and escalation of complex infrastructure issues.

CERTIFICATIONS

Introduction to Data Analytics | IBM | 2024

Supabase From Scratch: Serverless Database Backend with JS | Udemy | 2024

Microsoft Certified Computer Technician

CompTIA A+ Certified

EDUCATION

Bachelor of Arts, Sociology | University of Western Ontario, London ON

Associate of Arts | Fanshawe College of Applied Arts and Technology, London ON
